<b>3/15/2020</b>	16	4	4
<b>3/16/2020</b>	21	1	1

Note: The case number may be changed due to clerical error or change of the diagnosis in early days.

- a. Proportional change in the daily from the day before, and was calculated as incidental cases in the current day/those in the day before.
- b. The proportional change was calculated as ratio 1 in the current day/ratio 1 in the day before
- c. The completion date of the modelling with Farr's law. All daily incidence since Feb. 8, 2020 was prospectively collected, and compared with the predicted daily incidence.
- d. Not directly available, but calculated by subtracting estimated clinical diagnosis cases (85% of Hubei Province based on prior proportions) from the total reported cases in Wuhan city on Feb. 15, 2020.
